

# Special Education Program

Kenmore State High School recognises the need for all students to feel included in the school environment. The Special Education Program provides support and programs that meet individual needs for any student with a verified disability. The support provided by the staff ranges from Case Management to specialised classes and is centered around meeting Individual education goals.

## Specialised Support

Case Management is provided to all students verified with a disability. Case Managers provide assistance to students by caring for their individual needs, supporting their inclusion in mainstream classes and liaising between school and the family.

There are also two specialised subjects offered in the Special Education Program. These are designed to meet the Individual Educational goals for specific students. Student enrolment in these subjects is by incitation and is determined in consultation by the Head of Special Services and carers.

The small-group environment ensures students have a high level of assistance and a chance to develop skills and knowledge at their own pace. In order to provide students with a high level of assistance it is necessary to keep the classes small.

### Subjects offered

#### Targeted Assisted Tutorial

The Targeted Assisted Tutorial concentrates on the development of the whole student not just academic learning. The program focuses on addressing, monitoring and/or implementing some of the student's individual education goals, in a small, tutorial environment.

#### Life Skills

Kenmore SHS encourages the development of programs that meet the specific needs of individuals and groups, so as to ensure quality schooling and inclusive schooling practices. It offers development of basic living skills to enable students to achieve success in their social and school lives.
