VETiS Funding

Government funding under the VETiS program enables each student to complete one free Certificate II VET course while at school. The majority of our VOC courses are eligible for VETiS funding, should families wish to use the funding for this purpose. Certificate III and higher courses are not eligible for VETiS funding and will attract fees.

Families should consider carefully how they choose to use their VETiS funding as it can only be accessed once. If a student chooses to enrol in multiple VET courses, you may be required to pay course fees for the second and subsequent courses. In these instances, we recommend that students apply for VETiS funding for the most expensive course and enrol in any other VET courses on a fee for service basis. Costs for all VET Certificates offered at Kenmore SHS commencing in 2024 or 2025 are shown above. **Individual families are responsible for their own applications for VETiS funding, through the RTO providing the course. Once used, VETiS funding will not be available for any other VET Certificate courses.** This includes TAFE and courses offered by external training providers.
